Leverage Your Legacy Investment

Enterprise-class applications take years to create and perfect, and hundreds of thousands or even millions of dollars have been invested on those applications. Enterprises depend on the smooth and reliable execution of the software in order to keep the company operating flawlessly.

> How can enterprises protect and leverage the investments on those legacy applications?

> What is the simplest way to extend the life-span of those tried and true applications?

> How can IT administrators detach those applications from the OS and the aging hardware, and take advantage of the low-cost Windows PC systems?

Exceed XDK™ is the Answer!

Exceed XDK, an add-on to Exceed® and Exceed PowerSuite,™ is designed to allow developers port existing X applications from UNIX, Linux or VMS systems to the powerful Windows PC platforms with minimum re-programming requirements. Enterprises will enjoy the benefit from the great reduction in the cost of software development and the shortened development cycle. Software companies can capitalize on market opportunities by quickly releasing software that is based on existing source codes.
